

82% of Michigan's Family Medicine Residency Programs Achieve 100% Academy Membership

To ensure resident physicians at family medicine residency programs in Michigan are connected to the membership benefits of the Academy—networking, leadership opportunities, advocacy, and much more—Michigan Academy of Family Physicians works toward 100% resident membership at each program every program year.

As the 2022-2023 program year comes to a close, we celebrate the accomplishments of our state's 39 family medicine residency programs, congratulate the 2023 graduates, and recognize the 32 programs listed below for achieving 100% resident membership.

"MAFP has been such an asset to our team. Starting with our interns to our graduating senior residents, the MAFP/AAFP has been an incredible support in their development as family physicians. We are proud to work closely with MAFP and know we are a better program due to that relationship," said Richard Bryce, DO, Program Director, Henry Ford Hospital Family Medicine Residency (Detroit).

For 2023 resident graduates, AAFP is offering the gift of a [one-year digital subscription to *FP Essentials*](#), AAFP's monthly peer-review journal focused on new diagnostic methods, treatments, and guidelines.

MAFP welcomes the Class of 2026 to the family of family medicine in Michigan. Be sure to check out resident-specific resources and membership benefits on [MAFP's website](#) and [AAFP's website](#).
